*Non-GAAP Financial Measures

This press release includes the following financial measures defined as non-GAAP financial measures by the Securities and Exchange Commission: EBITDA and GAAP Net Income/(Loss) excluding one-time items. These supplemental financial measures are not required by GAAP, nor is the presentation of this financial information intended to be considered in isolation or as a substitute for the financial information prepared and presented in accordance with GAAP. Management recognizes that

non-GAAP financial measures have limitations in that they do not reflect all of the items associated with Asure's earnings results as determined in accordance with GAAP. However, for the reasons described below, management uses these non-GAAP measures to evaluate the performance of Asure's business. Asure's management believes that it is important to provide investors with these same tools, together with reconciliation to GAAP, for evaluating the performance of Asure's business, as it may provide additional insight into Asure's financial results. See the "Reconciliation of GAAP Net Income/(Loss) to Earnings Before Interest, Taxes, Depreciation, Amortization and Stock Compensation Expense (EBITDA)" and the "Reconciliation of GAAP Net Income/(Loss) to Net Earnings Excluding One-Time Items" tables included in this press release for further information regarding these non-GAAP financial measures. In addition, these measures are presented because management believes they are frequently used by securities analysts, investors and others in the evaluation of companies. EBITDA is calculated by adding income taxes, interest expense, depreciation and amortization and stock compensation expense to net earnings. EBITDA is not defined under GAAP and should not be considered in isolation or as a substitute for net earnings and other consolidated earnings data prepared in accordance with GAAP or as a measure of Asure's profitability.

Net Earnings Excluding One-Time Items is calculated by combining the company's GAAP Net Earnings, or earnings per share, with items that are one time in nature and are not expected to recur on a dollar or per share basis.

Free Cash Flow is computed by subtracting capital expenditures from cash flow from operations, each as determined in accordance with GAAP and as reflected in the statement of cash flows.

Non-GAAP Revenue is computed by adding back the deferred revenue fair market valuation to GAAP revenue.
