NetSimplicity Releases Family Scheduler Online; Online Version Allows Easy Access to Family Calendar From Internet

AUSTIN, Texas--(BUSINESS WIRE)--July 20, 2004--NetSimplicity, a leading provider of scheduling software, today announced the delivery of the online version of their recently introduced Family Scheduler product for today's families on the go.

Family Scheduler Online is a hosted version of Family Scheduler that allows any member of the family to access and update their calendar from anywhere they have Internet access. For example, this enables mother and father to access the calendar from work and the children to access the calendar from school.

"We're pleased to deliver this new version of Family Scheduler to the market," said Nancy Harris, vice president of software at NetSimplicity, a division of Forgent (Nasdaq:FORG). "We have responded to early feedback from our customers that indicated they wanted a Web-based product, and we have made that new version available in a short period of time at a very affordable subscription price of \$9.95 a month."

Family Scheduler is an easy-to-install, simple-to-use solution for any family that needs to schedule multiple activities and stay organized. A real time-saver, it's designed to help parents effortlessly keep track, by family member, of daily events for school, extra-curricular activities, doctor's appointments, neighborhood get-togethers and the like.

Family members' schedules are displayed in columns, side-by-side, making it easy to see each person's activities and the entire family schedule. With Family Scheduler, users can view and print the family's schedule for a day, a week or an entire month. Activities may be repeated daily, weekly, monthly or yearly.

Family Scheduler is available in two versions, an installed version that sells for \$49 and Family Scheduler Online, which is subscription-based and sells for \$9.95 per month. For more information, go to www.familyscheduleronline.com.
