"Our team is currently working through detailed accounting issues related to the amortization of the purchase price allocation from acquisitions and embedded derivatives," commented [Pat Goepel](#), Chief Executive Officer of Asure Software. "We are confident that our fourth quarter results will at least line up with the high end of our guidance range of \$540K - \$630K in EBITDA and \$3.530M - \$3.630M in revenue. In addition to our revenue & EBITDA, we are very pleased with free cash flow in Q4 which was more than \$1M. Our decision to move the earnings announcement date stems from the prudence of our due diligence, but our expectation of results at least in the high end of guidance is strong."
