

Asure Software Wins Silver for HR Technology Solution Provider of the Year in 2018 Stevie Awards for Great Employers

November 1, 2018

Asure Software recognized for its workspace utilization and occupancy sensors for helping companies around the globe optimize real estate footprint and design remarkable employee experiences

AUSTIN, Texas, Nov. 01, 2018 (GLOBE NEWSWIRE) -- [Asure Software](#) (NASDAQ:ASUR), the leading provider of integrated workforce and workspace software solutions, today announced that it was named the winner of a silver Stevie® Award in the HR Technology Solution Provider category for its SmartView workspace technology product.

[Asure Software's SmartView](#) is a complete, automated and integrated workspace utilization measurement system that monitors and reports on levels of occupancy, utilization and the environment. Powered by cutting-edge, unobtrusive Internet of Things (IoT) sensor technology, companies receive real-time occupancy data to understand and manage available real estate and workspaces.

Unlike other workplace utilization software systems, Asure Software's SmartView provides empirical data that help companies discern the type of spaces their people need to do their best, most productive work. These insights bring HR and IT together, allowing them to turn space utilization challenges into opportunities that not only dramatically save costs and grow revenue, but can also deliver remarkable employee experiences that retain and attract talent.

Asure Software's SmartView Features

1. **OPTIMIZE SPACE:** Most organizations still use a 1-to-1 desk-to-employee ratio. Achieving a higher ratio like 5-to-1 is not only possible—it can also save millions in overhead costs.
2. **CAPTURE UTILIZATION:** SmartView sensors detect heat, motion, temperature, light levels and more to help you understand utilization and how environmental factors impact productivity.
3. **PASSIVE DETECTION:** Discover actual space use—meeting rooms to individual workspaces—by passively capturing occupancy and utilization with unobtrusive sensors. Employees go about their regular work activities while SmartView collects data.
4. **OCCUPANCY INSIGHTS:** SmartView's added value is that it brings HR and IT together to turn space utilization challenges into opportunities, such as adopting hotelling strategies to consolidate space or by leading initiatives to improve the flow of office space in a way that reduces overhead costs and increases employee engagement.

The Stevie Awards for Great Employers recognize the world's best employers and the human resources professionals, teams, achievements and HR-related products and suppliers who help to create and drive great places to work. Nicknamed the Stevies for the Greek word meaning "crowned," this year, over 550 nominations from organizations across 21 nations submitted applications for consideration in a range of HR-related categories.

More than 50 professionals worldwide participated in the judging process to select this year's Stevie Award winners. Details about the Stevie Awards for Great Employers and the list of 2018 Stevie winners are available at www.StevieAwards.com/HR.
