

Asure Software Workplace IoT Sensors Announced as Finalist in Prestigious 2019 Edison Awards

March 5, 2019

AUSTIN, Texas, March 05, 2019 (GLOBE NEWSWIRE) -- [Asure Software](#) (NASDAQ:ASUR), the leading provider of workforce and workspace software solutions, today announced that its workplace IoT sensors was named a finalist in the Energy and Sustainability category for Smart Climate Control in the 2019 Edison Awards. The Edison Awards, named after Thomas Alva Edison, recognizes and honors the world's best in innovators and innovations. The Edison Awards will announce gold, silver and bronze award winners at the Edison Awards Gala held Thursday, April 4, 2019 in New York City.

Asure's workplace sensors provide real-time insights on levels of occupancy, utilization and the environment to help businesses optimize real estate and design smarter office spaces that reflect how their people actually work. In addition to understanding rates of utilization, these smart devices collect data on temperature, noise, light, air pressure and air quality around the office building to not only reduce energy costs, but also ensure it's one that enables talent to do their best, most productive work. By improving the employee experience and measuring how, when and where work gets done, Asure's workplace sensors can save companies millions of dollars in real estate costs, exponentially grow their revenue through more effective use of space, and drastically reduce their environmental footprint.

Asure's workplace IoT sensors environmental features include:

- Connects to Building Management (BMS) or Building Automation Systems (BAS) controlling energy allocation
- Monitors environmental factors to meet WELL Building standards
- Controls environment settings that improve employee health and wellbeing
- Increases building efficiency to dramatically reduce energy costs
- Reduces carbon footprint by allocating energy (e.g. HVAC, lighting) based on actual, real-time demand

All nominations were reviewed by the Edison Awards Steering Committee and the final ballot sent to an independent judging panel. The judging panel was comprised of more than 3,000 professionals from the fields of product development, design, engineering, science, marketing and education, including professional organizations representing a wide variety of industries and disciplines.
