

Asure Software Wins 2019 Silver Edison Award for its New Environmental Workplace Occupancy Sensors

April 9, 2019

AUSTIN, Texas, April 09, 2019 (GLOBE NEWSWIRE) -- [Asure Software](#) (NASDAQ:ASUR), the leading provider of workforce and workspace software solutions, has won a Silver Edison Award™ in the Energy and Sustainability category for Smart Climate Control for its SmartView workplace occupancy sensor system that accurately captures environmental conditions around the office building, including temperature, light, noise, air pressure and air quality. Named after inventor Thomas Alva Edison who symbolizes the persistence and excellence his innovation for his achievements, The Edison Awards™ has become one of the highest accolades a company can receive for innovation in new product and service development, marketing, and human-centered design.

Asure's [SmartView solution](#) selected by a judging panel comprised of more than 3,000 professionals from the fields of product development, design, engineering, science, marketing and education, including professional organizations representing a wide variety of industries and disciplines.

A fully automated and integrated space utilization measurement system of workplace IoT occupancy sensors and analytical tools, SmartView helps businesses understand and optimize available real estate and workstations. With its unique ability to bring utilization analytics and important environmental data into one unified system, organizations are able to confidently implement smarter office designs that reflect a more effective use of space, while also being able to make educated and cost-effective decisions about their workspace that will dramatically reduce energy costs, increase building efficiency and improve employee health and wellbeing.

Asure's SmartView environmental features include:

- Connects to Building Management (BMS) or Building Automation Systems (BAS) controlling energy allocation
- Monitors environmental factors to meet WELL Building standards
- Controls environment settings that improve employee health and wellbeing
- Increases building efficiency to dramatically reduce energy costs
- Reduces carbon footprint by allowing energy to be allocated (e.g. HVAC, lighting) based on actual, real-time demand
