

Asure Software Partners With Amazon Web Services Application Modernization Lab

July 11, 2023

- *Collaboration Creates Opportunities to Leverage Modern Advancements in Cloud Optimization and Artificial Intelligence for Ongoing Platform Development*
- *Strategic Partnership Allows Asure Opportunity to Provide Customers with Unprecedented, Modernized Human Capital Management Software Solutions that Enable Enhanced Performance, Scalability and Security*
- *Asure Part of Elite Group Selected to Partner with AWS based on Innovation Focus and Technical Expertise*

AUSTIN, Texas, July 11, 2023 (GLOBE NEWSWIRE) -- [Asure Software](#) (NASDAQ: ASUR), an established provider of cloud-based Human Capital Management ("HCM") software solutions, today announced it has been selected for Amazon Web Services' ("AWS") Application Modernization Lab, an exclusive group comprised of 10 – 12 of AWS' most innovative customers with a clear focus on modernization strategy. Through the elite program, Asure is collaborating directly with AWS to define and leverage a distinct development framework to enhance its HCM SaaS ("Software as a Service") offerings with advancements like cloud optimization and artificial intelligence ("AI") to deliver premium agility and speed to market.

"As a result of their deep technical expertise and laser focus on innovation, our stellar team of engineers was hand-selected by AWS, the world's most comprehensive and broadly adopted cloud offering, and we're excited about the opportunities this strategic collaboration creates for us to better serve our customers," said Pat Goepel, Chairman and CEO for Asure. "Our mission at Asure is to provide HCM software and services that help our customers grow, and our unique partnership with AWS through their Application Modernization Lab aligns perfectly with this goal, creating a path to deliver the most advanced and secure cloud platform resources in the world to help them accelerate their business operations."

The AWS Application Modernization Lab provides an opportunity for the technology teams of select organizations to collaborate with AWS to build a well-architected framework that promotes cloud-based development innovation with the key pillars of operational excellence, security best practices, performance efficiency, and cost optimization. Asure is using this framework to expedite modernization efforts that ultimately provide customers with a cloud-optimized environment that leverages the latest advancements in emerging tech like robotics and AI, while removing traditional efficiency roadblocks like Windows dependency and the proliferation of competitive licensing costs.

"Asure was chosen from a very select group of AWS' top partners based on the common goal of advancing cloud-based solutions to address real-world business challenges. Through a rigorous eight-week vetting process with AWS' cognitive experts, we were able to establish key modernization pathways and playbooks to support our operational framework going forward," said Yasmine Rodriguez Wakim, CTO for Asure. "By partnering with AWS, we are able to accelerate our modernization journey by updating legacy platforms and rearchitecting our systems. This not only optimizes our cloud environment but also empowers us to respond exponentially faster to HCM market demands and changes."
