

Asure Software Announces Enhancements to iEmployee Time & Attendance That Allows Customers to Reduce Expenses

Product Update Helps Companies Better Control Employee Time-Off Programs

AUSTIN, TX, Sep 25, 2008 (MARKET WIRE via COMTEX News Network) -- Asure Software (NASDAQ: ASUR), a leading provider of workforce management software, announced availability of a new release to their popular Labor and Time Management product, iEmployee Time & Attendance, that provides users with greater visibility and control over Paid Time-Off (PTO) programs. These improvements allow companies to reclaim lost revenue by ensuring policy adherence across the entire organization.

As reported by HR.com in a global survey on employee time-off(1), the average employee claims three days of unreported PTO per year, costing the typical 1,000 person company \$330,000 per year. The updates made to iEmployee Time & Attendance permits organizations to practically eliminate the opportunity for overpayment due to non-compliance on timesheets.

Built based on feedback from human resources and payroll professionals, the Time & Attendance module's enhancements include:

- An intuitive accrual wizard -- making it easier to implement and enforce PTO policies
- Greater visibility through new reporting that makes it easier to track and report on PTO
- Enhanced calendaring options for Microsoft Outlook that allow users to import personal data from iEmployee

"Customers frequently remark how iEmployee saves their company money by improving how they administer PTO Programs," said John Stockton, Vice President of Product Management for Asure Software. "We recognize for most organizations transitioning from paper-based systems to web-based solutions that automates employee time tracking can be distressing. That is why iEmployee goes to great lengths to ensure we offer solutions that are easy-to-use, quick-to-implement and cost-effective -- regardless of company size."
